AluNova Inspection Door

with impregnated gypsum plasterboard inlay H2/GKBI (12.5mm, 15mm, 2x12.5mm)
For installation in walls and ceilings in drywall construction

Tested Product:
Sound insulation values:
Rw = 30 dB (12.5mm) Rw = 33 dB (2x12.5mm)
(for size 600x600)

Product Advantages

- Impregnated gypsum plasterboard inlays suitable for wet rooms
- Security snap locks self-adjusting (from size 200x200)
- All-round lip seal protects against dust and draughts

Product Description

The AluNova inspection door is intended for installation in walls and ceilings in drywall construction. The screwed down gypsum plasterboard inlay is impregnated and is, therefore, also suitable for wet rooms. The door cover is secured on both sides by means of self-adjusting security snap locks. The security snap locks ensure the retention of the door cover on every opening. Opening and closing takes place by pressing on the door cover and the two hidden snap locks.

Scope of Supply

- ✓ Inspection door
- ✓ Installation kit protective caps for screws
- ✓ Installation instructions

Installation and Fixing

Simple fitting of the mounting frame in the structure opening. This must be made approx. 5-10mm larger than the installation dimensions of the inspection door. For wall mounting, the locks must be arranged at the top. The fixing takes place from the front through the panelling and the mounting frame using customer-supplied drywall screws. Fit the protective caps to the rear of the screw tips. Fill the joints and fit and close the door cover. Please always observe the installation instructions supplied!

Filling and Painting Work

Fill he joint between the mounting frame and structure opening. Separately fill and dry the door cover. Then separately coat and dry it again before fitting. Completely remove any filler and paint residues. All the metallic surfaces and seals must be clean. Then carry out a functional check by opening and closing several times.

Cleaning and Maintenance

The components of the inspection door must be cleaned using conventional, mild cleaning agents or be cleaned dry. The door must always be properly closed. Check the function of the locks from time to time. The inspection door is maintenance-free.

Special Models

- Available with a square lock
- Available with a cylinder lock
- Available in air and dust-tight design

Accessories

Article 22-212 RS Square Lock (for retrofitting)
Article 22-216 Square Key
